

ADVANTAGES OF IMPLANT SUPPORTED PROSTHESIS

OUTLINE

Introduction

Pros of the implant supported prosthesis

Conclusion

Introduction:

Dental implants are the gold standard for restoring lost teeth, especially in patients who are fully edentulous. Here are some advantages of adopting Implant Supported Prosthesis.

Pros of the Implant Supported Prosthesis:

1. keeps bones strong
 2. Preserves and reestablishes Occlusal Vertical Dimension
 3. Preserves the appearance and tone of the muscles
- It enhances speech, occlusion, oral proprioception, and number four, speech.
7. It raises prosthetic success rates.
 8. It enhances facial expressiveness and mastication
 9. The prosthesis' size is lowered;
 10. It offers both fixed and detachable prostheses;
 11. It increases the stability and retention of removable prostheses;
 12. It lengthens the prosthesis' survival period.
 13. More durable replacements can be made,
 14. general psychological wellness is enhanced.

DEPARTMENT OF ORAL AND MAXILLOFACIAL SURGERY

15. There is an increase in general health.

Advantages of the Dental Implants always outweighs the Pros of Non implant supported prosthesis.

Conclusion

It is important to note that the success of implant-supported prostheses depends on factors such as proper oral hygiene, regular dental check-ups, and a healthy jawbone. Additionally, the placement of dental implants requires a surgical procedure, which may involve a healing period before the prosthesis can be attached.
