

5.1.4 The institution has an active international student cell to facilitate study in India program etc.,

INTERNATIONAL STUDENT CELL

The collaboration between the International Student Cell of Priyadarshini Dental College and Hospital and the Priyadarshini Dental College Alumni Association has led to the establishment of a unique and enriching "Study in India" program. This innovative partnership aims to foster a strong sense of community and cross-cultural exchange, providing international students with exceptional educational opportunities in the field of dentistry.

The Priyadarshini Dental College Alumni Association, comprising distinguished dental experts and professionals who graduated from the institution, plays a pivotal role in enriching the course. Alumni members serve as mentors for international students, sharing their wealth of knowledge and experience, assisting them in their academic pursuits, and helping them navigate the challenges of studying abroad.

Central to the success of international students at Priyadarshini Dental College and Hospital is the International Student Cell. This specialized cell ensures a seamless integration of international students into academic and social life, addressing aspects ranging from accommodation and enrollment to cultural orientation and extracurricular activities. By providing comprehensive support services, the International Student Cell fosters a welcoming environment, empowering international students to thrive in their studies.

Through the "Study in India" program, international students have the opportunity to fully immerse themselves in a high-quality dental education. The program combines rigorous academic instruction with practical clinical experiences, leveraging the institution's cutting-edge facilities and knowledgeable faculty. The guidance and direction provided by the Priyadarshini Dental College Student Association further enhance the learning experience.

Beyond academic enrichment, the program actively promotes cross-cultural dialogue and intercultural understanding. International students engage with their Indian counterparts, share cultural customs, and develop a heightened awareness of diversity. This cross-cultural contact not only enriches the learning experience but also broadens perspectives, equipping students to become compassionate and well-rounded dental professionals in an increasingly globally interconnected society.

Over the past five years, the program has successfully attracted approximately 11 members, with nine of them having already graduated with flying colors from the institution. This highlights the program's effectiveness in providing international students with a transformative educational experience.

In essence, the innovative "Study in India" program is the fruit of the concerted endeavors between the Priyadarshini Dental College alumni association and the International Student Cell of Priyadarshini Dental College and Hospital. Going beyond the provision of a top-notch dental education, this program is designed to cultivate in students not only the knowledge and expertise required for excellence in the dental profession but also the values and skills essential for assuming the mantle of responsible global citizenship.

Through collaborative efforts, the alumni association and the International Student Cell have worked synergistically to create a program that not only elevates the standard of dental education but also strives to mold individuals who can positively impact the world. As students engage in this comprehensive educational journey, they are not only equipped with the skills to excel in the dental profession but are also inspired and empowered to contribute meaningfully to the broader societal context.
